Art Unit: 2826

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: No prior art discloses

temperature measurement using the parasitic characteristics of the semiconductor device under test in

order to determine its reliability. The closest related prior art is Lipp, which discloses a temperature

measurement circuit which uses a temperature dependent junction voltage. The circuit of Lipp utilizes

parasitic bipolar transistor elements formed in a CMOS substrate, but it does not disclose a heating

element formed within the device under test, nor does it disclose stressing the device under test in order

to observe a possible failure.

Any comments considered necessary by applicant must be submitted no later than the payment

of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such

submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should

be directed to Scott R. Wilson whose telephone number is 571-272-1925. The examiner can normally be

reached on M-F 8:30 - 4:30 Eastern.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Nathan Flynn can be reached on 571-272-1915. The fax phone number for the organization where this

application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be obtained from

either Private PAIR or Public PAIR. Status information for unpublished applications is available through

Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic/Business Center (EBC)

at 866-217-9197 (toll-free).
